

2020 Legislative Landscape

Legal Challenges

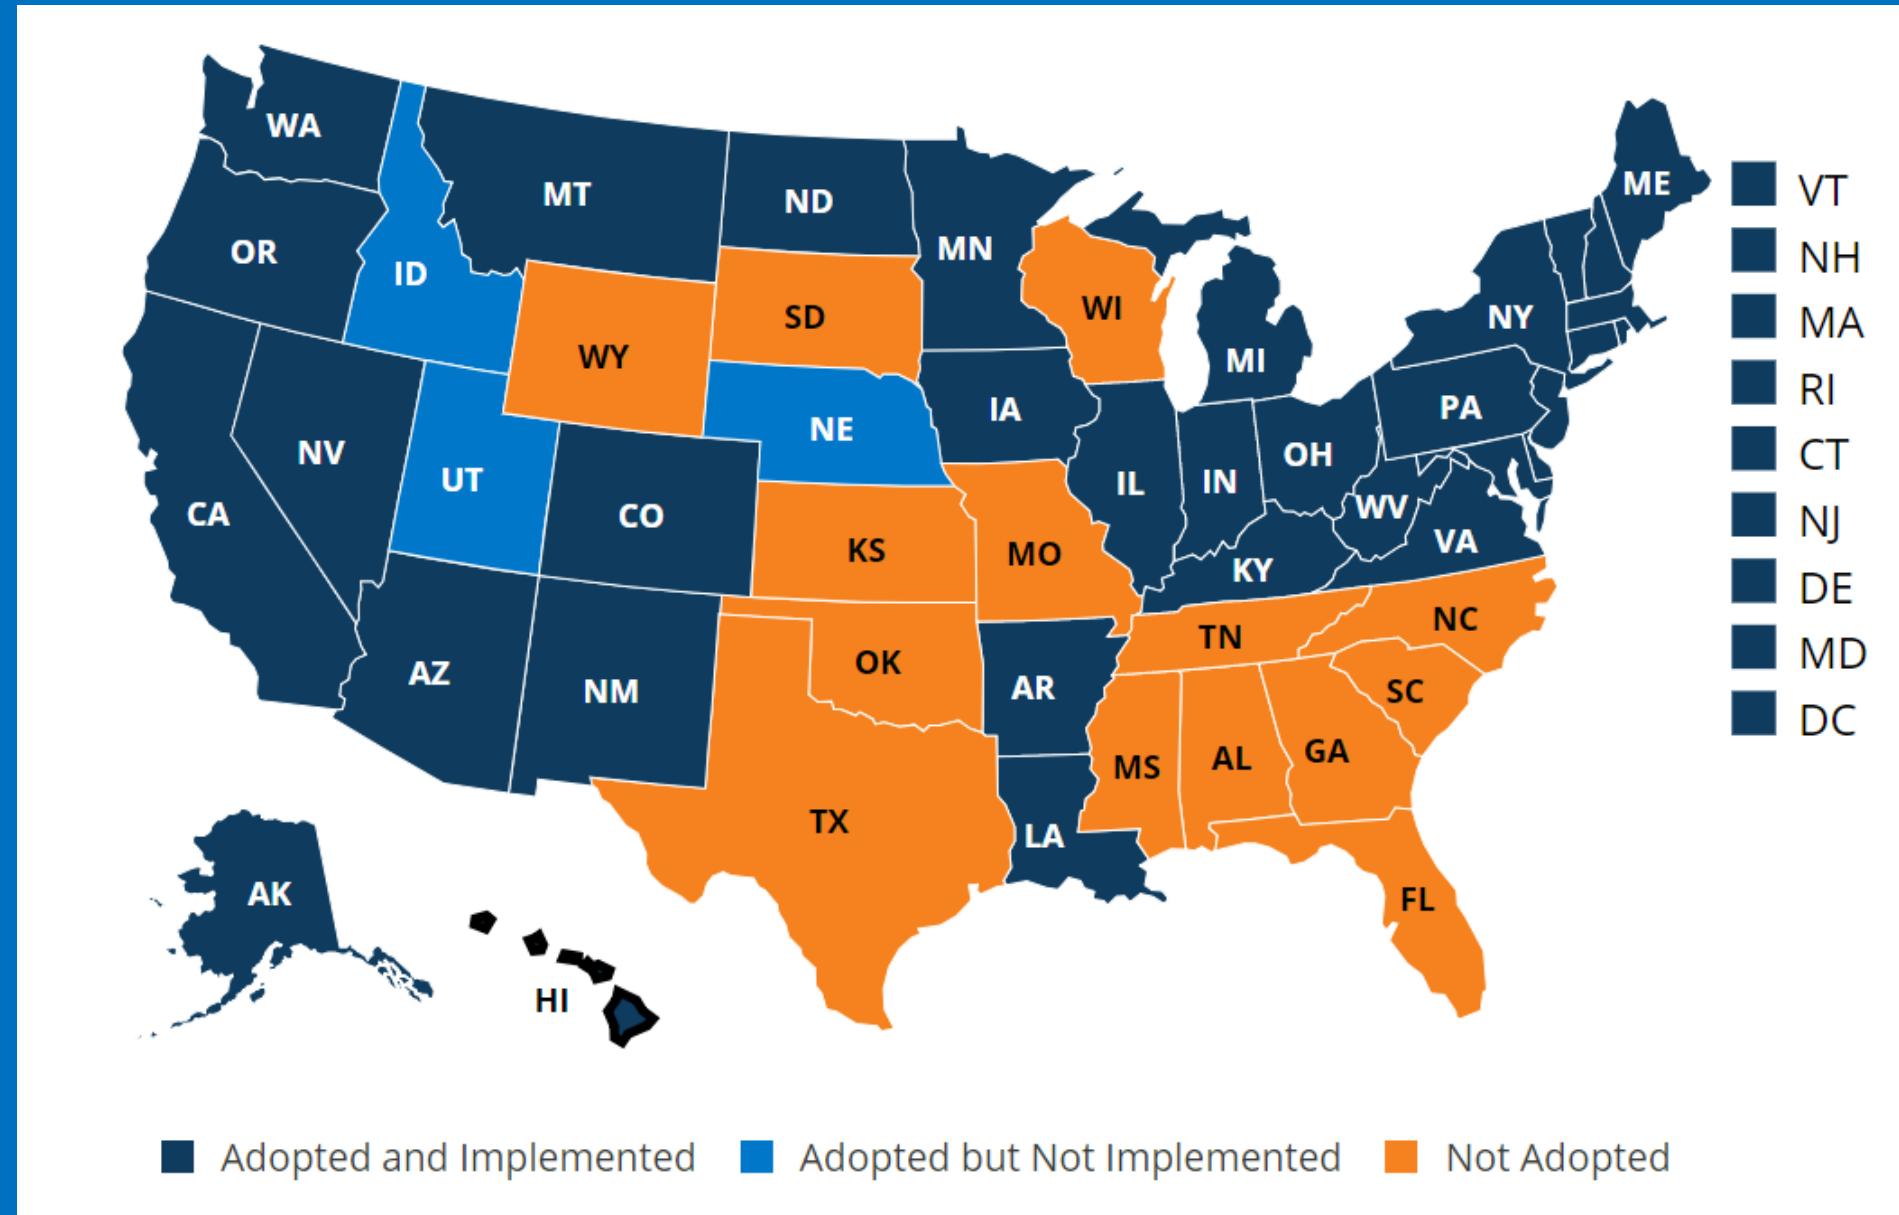

Legislative Market Reforms

ACS CAN supports:

- Reversing expansion of Short Term Limited Duration insurance plans
- Limitations on Association Health Plans
- Legislation to address surprise billing
- Establishing a reinsurance program
- Restoring outreach and enrollment funding
- Enacting the patient protections in the Affordable Care Act into state law {pre-existing conditions, no life time or annual limits}

Medicaid

Join the conversation

Medicaid covers US

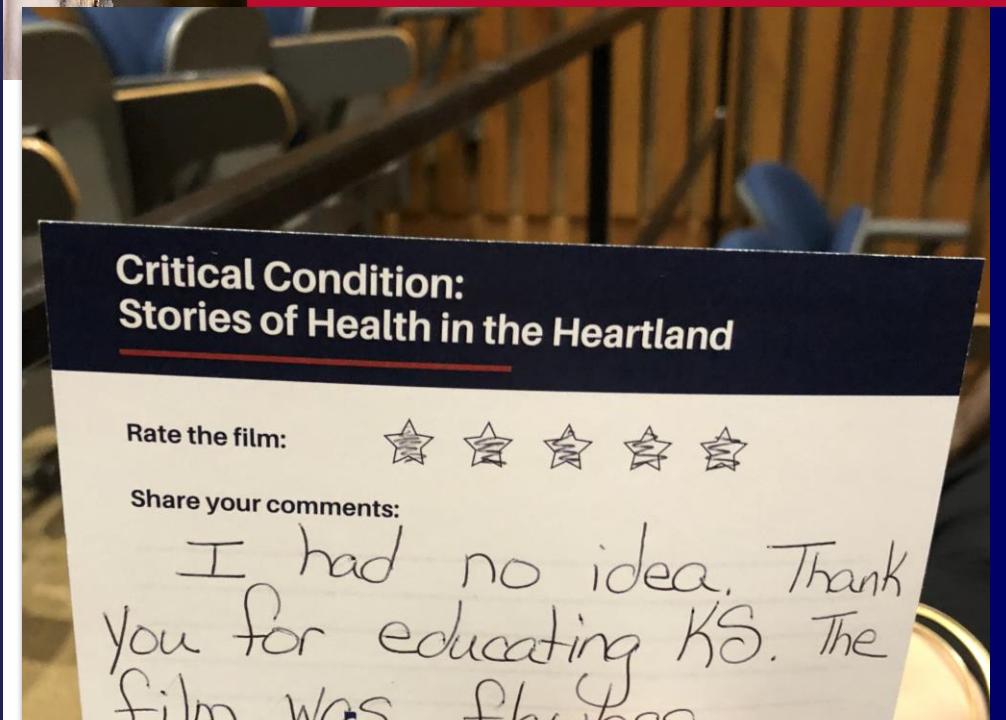

“Medicaid made it possible for my daughter to get the surgery she needed to start walking.”

Peyton

“Medicaid allows patients I serve to have essential health coverage. Without it, they would remain uninsured and be forced to let their diseases go unmanaged, untreated, or undiagnosed leading to detrimental and in some cases fatal outcomes.”

Shaundelette

Utilization Management

- ❖ One in three cancer patients and caregivers of cancer patients (34%) report experiencing delays in their or their loved one's cancer care because their physician was waiting on approval from their health insurance plan for a cancer treatment, test, or prescription medicine.
- ❖ Majorities of physicians report delays in their patients' cancer care are happening frequently because of having to wait for approval from their patients' health insurance plans.
- ❖ Younger cancer patients and caregivers are more likely to report they or their loved one have experienced delays in cancer care (58% among ages 18-44, 28% among ages 45-64, and 17% among ages 65+).
- ❖ Seven in ten physicians or more report that UM techniques are having a negative impact on their cancer patients' care.

SAIM COALITION

— STATE ACCESS TO INNOVATIVE MEDICINES —

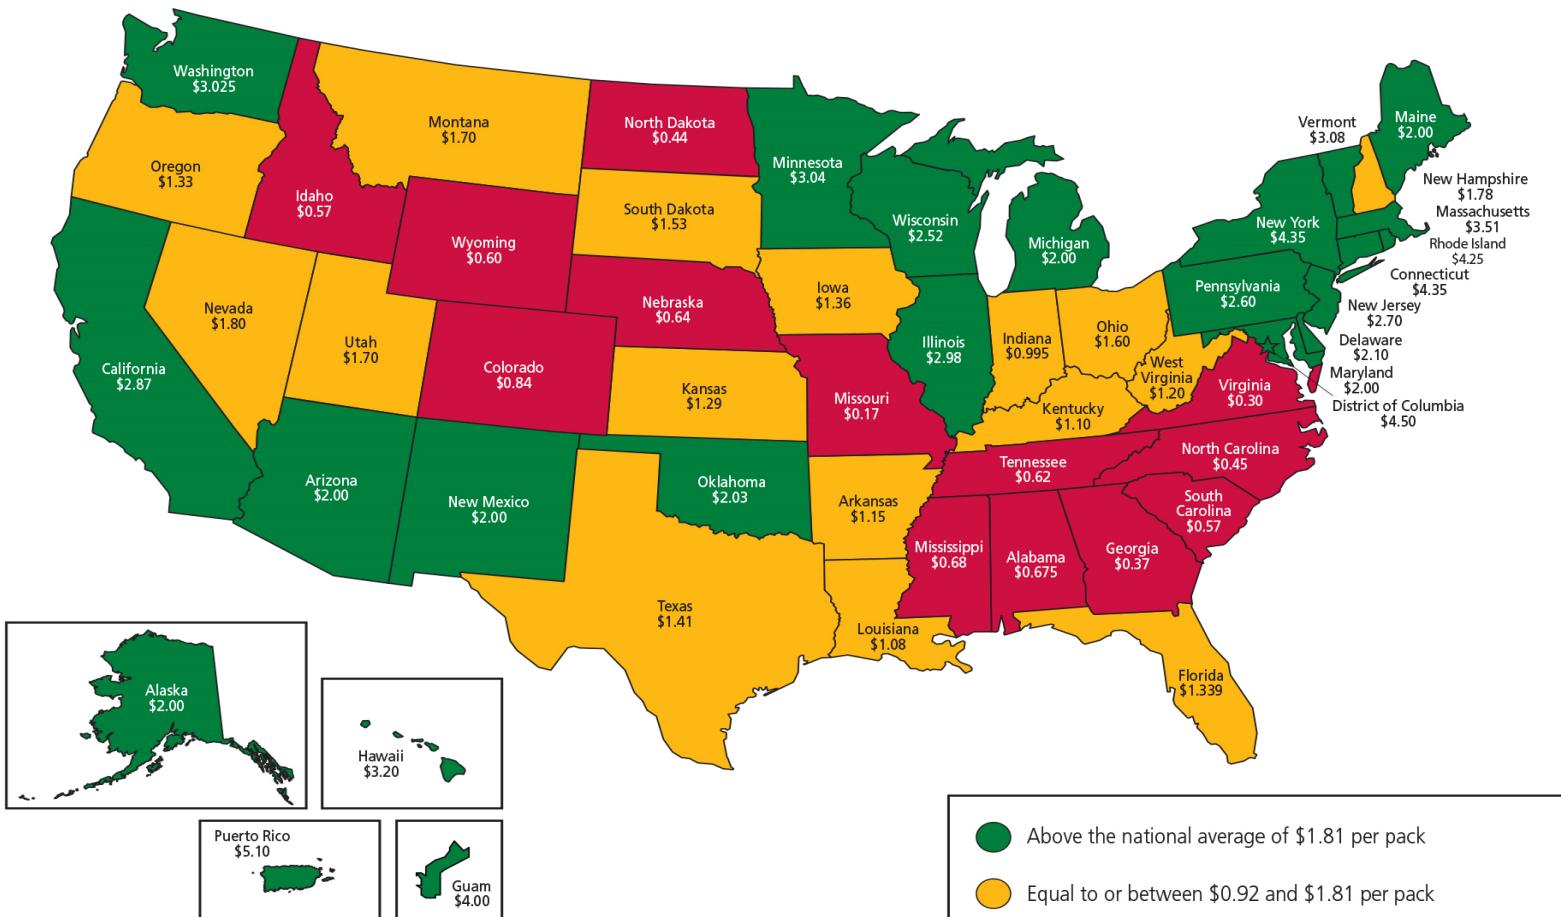

- The Legislation will:
 - Ensure step therapy protocols are based on widely-accepted medical and clinical practice guidelines.
 - Create a clear and expeditious process to request a medical exception and requiring a response by the patient's health plan within 72 hours for non-emergency and 24 hours for emergency situations.
 - Provides certain circumstances for a patient to override the step therapy protocol when the drug required under the step therapy protocol
- The Legislation will not:
 - Require a health plan to cover any prescription drug not already on formulary and does not make any changes to the benefit design, formulary coverage, tiering of drugs or out of pocket requirements of the patient.
 - Prevent insurance companies from using step therapy or limit the number of required steps.
 - Prevent insurers from requiring prior authorization before covering a prescription.
 - Prevent insurers from requiring patients to try a generic version of a drug if it is equivalent to the brand name prescription.

Addressing the epidemic of youth tobacco use

- E-cigarettes
- Prohibiting all flavored tobacco products, including mint and menthol
- Engaging at all levels of government
 - Call on FDA to regulate and Administration to take action
 - Federal legislation
 - State & local efforts

2019 State Cigarette Excise Tax Rates

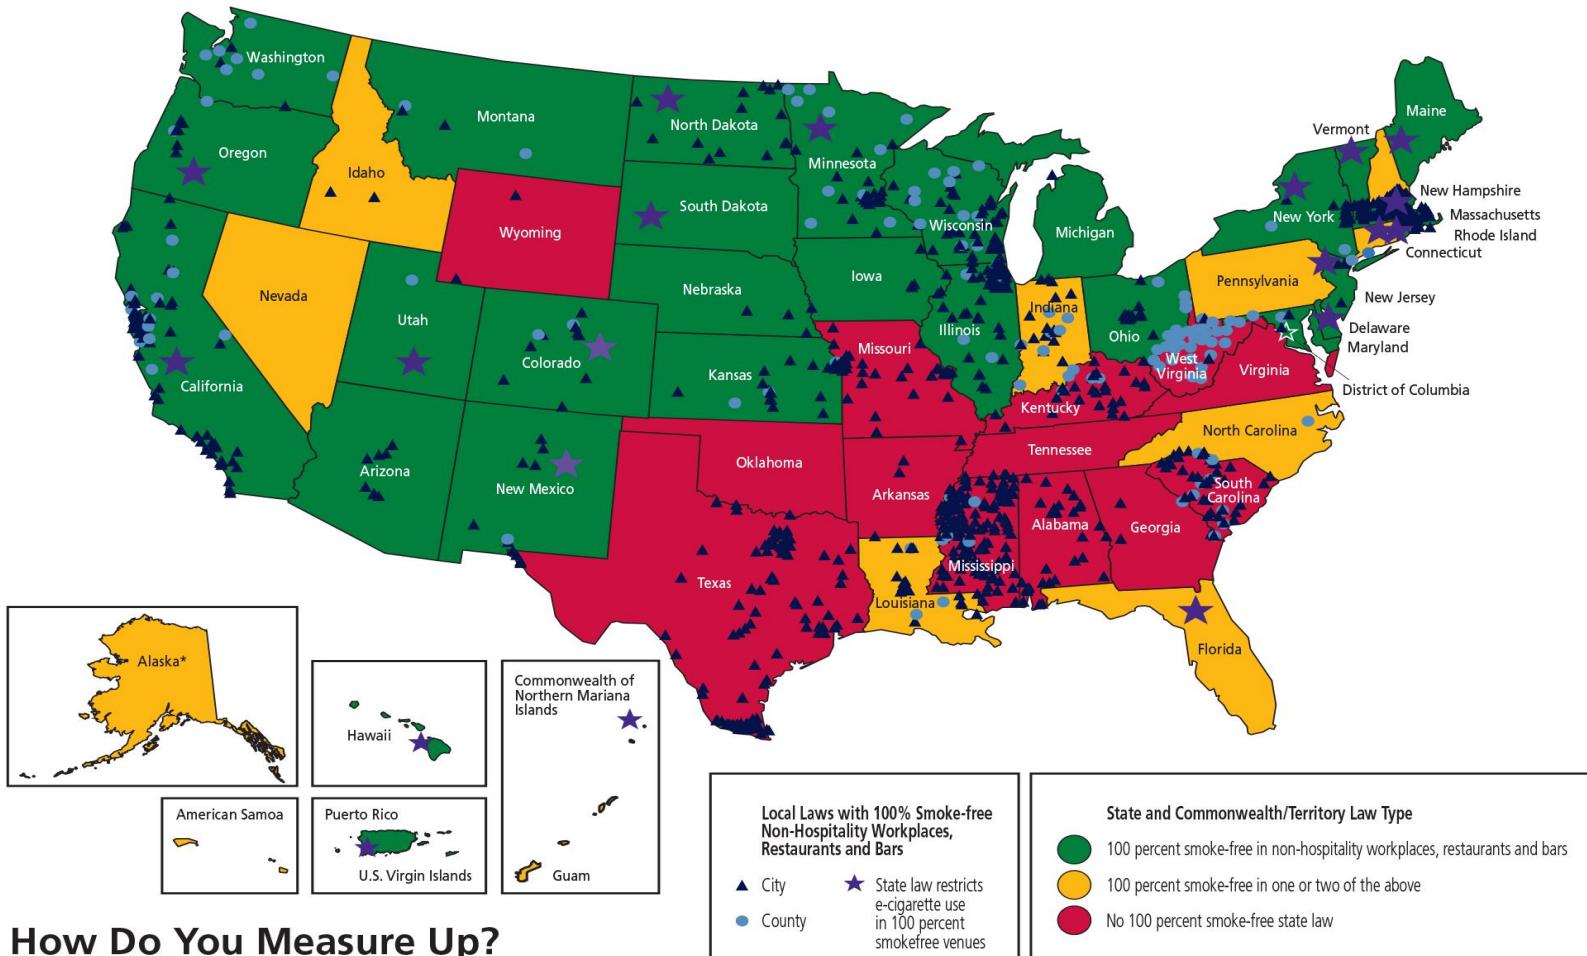

How Do You Measure Up?

- Above the national average of \$1.81 per pack
- Equal to or between \$0.92 and \$1.81 per pack
- Equal to or below \$0.91 per pack (50% of national average)

Tobacco taxes for Puerto Rico and Guam are not included in the national average.
Rates in effect as of July 1, 2019.

Smoke-free Legislation at the State, County and City Level

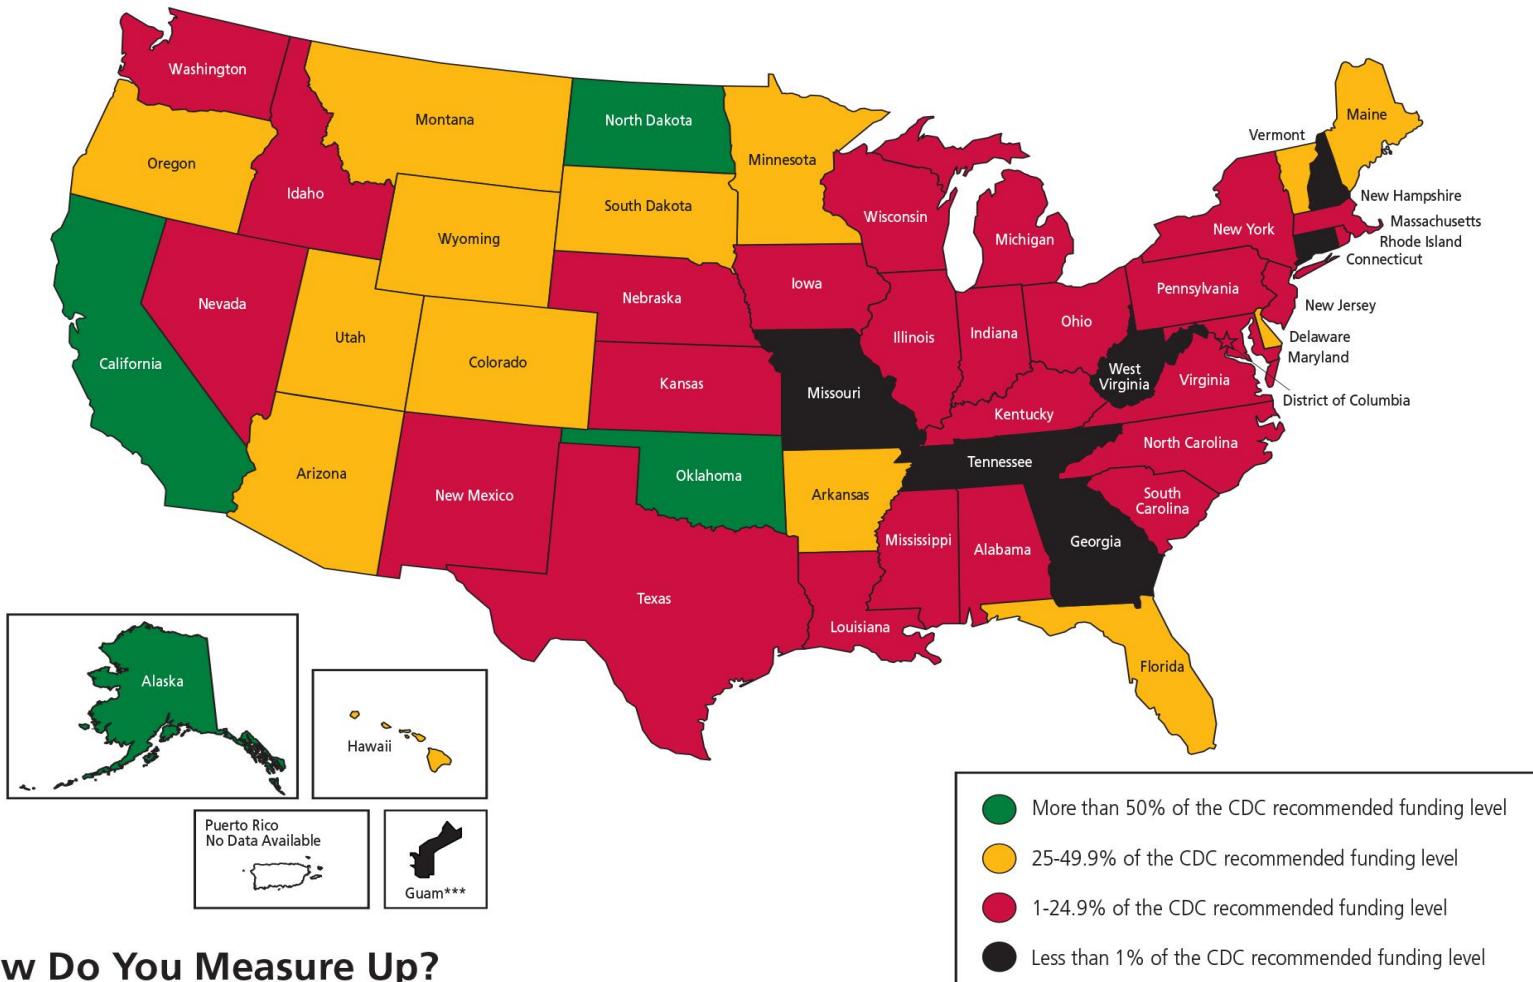

Note: American Indian and Alaska Native sovereign tribal laws are not reflected on this map.
